Provider Name: _____ Phone # _____ Fax # _____

Provider
<ul style="list-style-type: none"> • Patients with possible liver damage due to drug abuse or alcoholism need to have bloodwork (CBC & CMP) within 1 year of first infusion. • Patient must not hold a pilot's license. • Patient needs to be screened for violent history (exclude self-inflicted violence). • Some patients may require a note for employment drug screenings which states they are under prescription Ketamine infusion (Can be done at Oklahoma Ketamine Center).
Current Medications
<ul style="list-style-type: none"> • Patients taking Risperdal (Risperidone), Zyprexa (Olanzapine), and Lamictal (Lamotrigine) should discontinue usage 5 days prior to treatment. These drugs inhibit Ketamine effectiveness. • Patients receiving hormone replacement pellets are required to wait 2 weeks from the date of injection before beginning Ketamine treatment. • Patients should continue taking all other prescribed medications as ordered by their provider.
Labs
<ul style="list-style-type: none"> • 10-panel drug screen (Can be done at Oklahoma Ketamine Center). • CBC & CMP (if applicable) - performed by lab of provider's choice or can be scheduled with LabCorp by Oklahoma Ketamine Center.
Additional Notes
